

Systems of the Body

THE CIRCULATORY SYSTEM

- Skull and blood vessels of the head
- Thorax
- Heart
- Blood vessels supplying the heart
- Spleen
- Blood vessels of the upper limbs
- Blood vessels of the lower limbs
- Circulation of blood and lymph
- Lymphatic system

THE RESPIRATORY SYSTEM

- Nose
- Pharynx and larynx
- Thorax
- Lungs
- Trachea
- Bronchus
- Alveoli and gas exchange
- Muscles related to respiration

THE BRAIN & NERVES

- Head and neck
- Brain
- Spinal cord
- Nerves of the upper limbs
- Nerves of the lower limbs
- Nervous system

THE DIGESTIVE ORGANS

- Oral cavity
- Teeth
- Abdomen
- Esophagus
- Stomach
- Duodenum
- Small intestine, large intestine, and anus
- Digestion and absorption: wall of the digestive tract
- Liver
- Gallbladder
- Pancreas

THE URANIARY & REPRODUCTIVE ORGANS

- Breast
- Abdomen
- Kidneys
- Bladder
- Urethra
- Male reproductive organs
- Female reproductive organs
- Mechanism of menstruation
- Pregnancy

THE SENSORY ORGANS

- Head and neck
- Eyes
- Ears
- Nose
- Oral cavity and teeth
- Breast
- Skin and hair

THE MUSCLES & BONES

- Skull and blood vessels of the head
- Muscles related to respiration
- Bones and muscles of the upper and lower limbs
- Shoulder joint
- Elbow joint
- Joints of the hand
- Hip joint
- Knee joint
- Joints of the foot
- Muscles
- Bones

THE ENDROCINE ORGANS

- Breast
- Abdomen
- Endocrine organs
- Male hormones
- Female hormones
